

Henry®

“Make sure your roof repairs are
done right...the first time
with Henry Leak Repair Systems.”

Repair potential leak areas now, before damaging leaks occur.

Henry Leak Repair Systems

- Trust Henry's full line of premium quality cements, mastics, and patching fabrics for all your repair needs.
- Designed for easy application—during preventive maintenance or emergency leak repairs—on almost any roof surface.
- Repair holes, cracks, and splits in asphalt, metal, composition, SBS modified bitumen, etc.

See reverse for system descriptions

leak repair systems

Description

- Henry leak repair products combine to seal roof leaks of most commercial, industrial or residential roof surfaces.
- Cracks and holes can be repaired in driving rain or under water in warm climates or cold conditions with Henry 208 Wet Patch® Roof Cement.
- Metal roofs can be sealed with Henry 295 Metal Seam Sealer.

Recommended Uses

- Repair holes, cracks and splits on composition, mineral surface cap sheet, asphalt coated, SBS modified, metal and built-up roofs.
- Seal leaks and openings around flashings, chimneys, vents, skylights, joints in metal edging, gutters or any other typical rooftop penetration.

Leak and Repair Analysis and Detection

Benefits of selecting a qualified professional to deal with your roofing problems:

- Determining the source of the problem is often the most difficult part of the repair process. Experienced Henry Maintenance Systems contractors can recognize the difference between wall, roof and mechanical leaks, and save you the aggravation of repeated costly attempts to solve the problem.
- When a repair is performed correctly it is permanent. As you see in the following illustrations, the repair system is reinforced to prevent shrinkage and cracking. Later when the weather allows, the repair may be coated with a reflective material to assure a long lasting repair.
