

Henry® Prodeq™ System

High Performance, Spray-Applied, Instant-Setting Waterproofing System

The Henry® Prodeq™ System

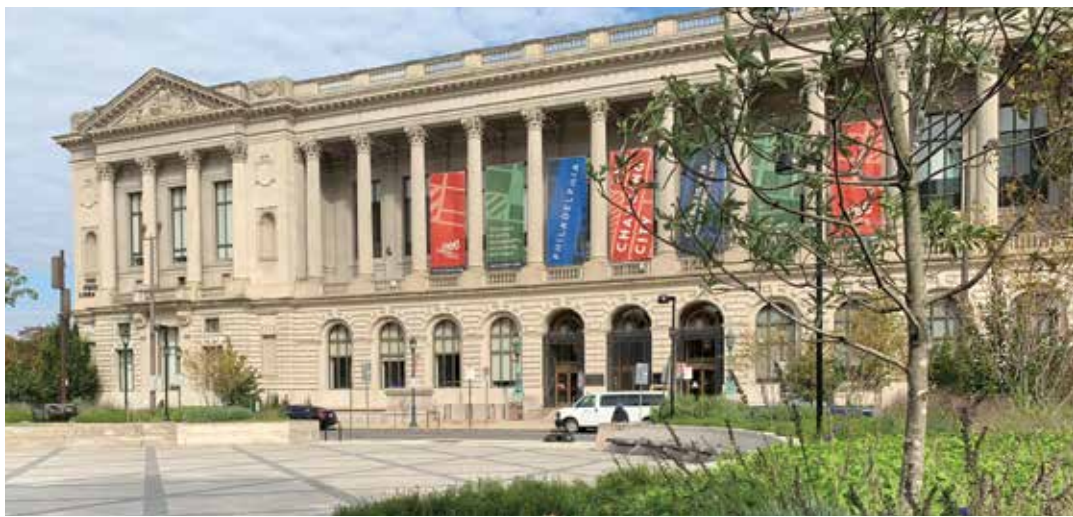

A comprehensive waterproofing system for plaza decks, roofs, split slabs, terraces, as well as water containment and UV exposure, the Henry Prodeq System can be fully warranted for up to 25 years.* Its installation speeds up the construction program, and requires no protection board or root barrier. The instant-setting, high performance, seamless membrane allows for complex building design and requires no welds, laps, termination bars or surface flashings. The Prodeq System provides superior waterproofing protection with a variety of overburden solutions, allowing for both design and budget flexibility. The system can be directly trafficked by construction vehicles. The Henry Prodeq System is VOC compliant and has no odor.

*Warranty may qualify for overburden removal 25 year warranty under the Henry Gold Seal Warranty. When used in a water containment system, up to a 10 year Material or System warranty is available.

Water Containment System, UT

Green Roof and Plaza, Philadelphia, PA

Green Roof, Falls Church, VA

Rooftop, Brooklyn, NY

Features & Benefits

Innovative, instant-setting, spray-applied technology

Spray applied membrane speeds installation time and can reduce labor costs

Durable, robust membrane can be directly trafficked by other trades and construction vehicles

No protection board or root barrier are required, reducing material and labor costs

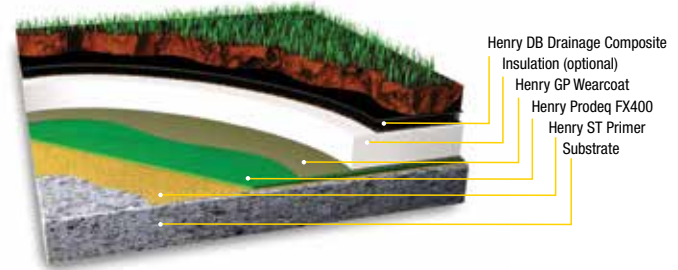

Zero VOCs and no odor

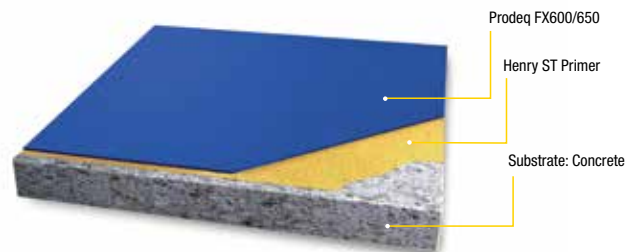

Typical uses for the Henry Prodeq System:

- Green roofs
- Split slabs
- Plaza decks
- Planters
- Terraces
- Water containment
- UV exposure
- Interior waterproofing

Henry Total Quality Service

This unique installation service is our commitment to maintaining the highest possible standards in liquid applied waterproofing.

The Henry Prodeq System is an integral part of the advanced waterproofing systems offered by Henry Company and is commonly used for complex and challenging projects. To support installation in these projects, Henry provides its fee-based Total Quality Service to authorized installers in order to maintain high quality standards from concept to project completion.

As part of the Henry Total Quality Service, we will carry out all necessary inspections, including observing site conditions, surface preparation and profile, and signing off before work can commence. Additionally, Henry offers access to multiple spray rig configurations to meet all jobsite requirements, whether it be a roof terrace or large plaza deck. For contractors who have their own spray rigs, we offer the same level of service including installation support at the time of application.

Installation of Prodeq FX400 membrane

Henry® Prodeq™ Waterproofing System Selection Chart

Use the selection chart below to choose which Henry Prodeq System is right for your waterproofing application.

Products		Plaza Deck System	UV Exposed System	Water Containment System
Primer	Henry ST Primer 20	•	•	•
	Henry GC Epoxy Primer ¹	•	•	•
	Henry LV Primer	•	•	•
Membrane	Henry Prodeq™ FX400	•		•
	Henry Prodeq™ FX425		•	
	Henry Prodeq™ FX600			•
	Henry Prodeq™ FX650 ²			•
Wearcoat	Henry GP Wearcoat	Optional ³		
Aggregate	Sand sieve size 20-30 or approved by Henry®	As required ³		

1 Henry GC Epoxy Primer may be used in lieu of Henry ST Primer or Henry LV Primer on green or damp concrete surfaces

2 When NSF 61 Potable Water Certification is required

3 Henry GP Wearcoat and Aggregate may be required when the Prodeq Plaza Deck System is expected to be left exposed and trafficked for long periods of time prior to being covered with overburden

With a proven track record in North America since 2000, the Henry Prodeq System provides superior waterproofing protection for plaza decks, green roofs, split slabs, terraces and water containment systems. Contact a Henry Representative today to see how a Prodeq System can help you build with confidence on your next project.
